

ALBERT PALEY STEEL FIRE TOOLS

## **Description**

A set of fire tools by Albert Paley in formed and fabricated steel with a blackened finish, comprising a stand with three implements — poker, shovel, and tongs. An exceptionally executed and decadent design with sharp outlines evocative of a rough sketch in charcoal, the set is a freestanding sculpture that just happens to serve a practical function. American studio craft at its very best. Impressed to base, "Albert Paley 1996", and registered as "DF 1996 01" with the Paley Studio Archives, this set is from an edition of 20 examples.

41 h x 16 w x 13 d

Condition: good, age appropriate wear

\$7,800
